European Open Source Convention

Monday, September 18, 2006 - Thursday, September 21, 2006

Hotel Le Plaza

Bd Adolphe Maxlaan, 118-126 (Yahoo! Maps, Google Maps)
Brussels, Brussels 1000

The O'Reilly European Open Source Convention is where coders, sys admins, entrepreneurs, business people working in free and open source software gather to share ideas, discover find solutions. At EuroOSCON 2005, nearly 500 delegates took part in sessions and tutorials in eleven technology tracks, learning about the newest features and versions from creators and experts. We anticipate that EuroOSCON 2006 will be even more successful--the place for the open source community to meet up, debate, make deals, and connect face to face with other open source enthusiasts from across the continent and around the world. EuroOSCON 2006 will take place at the Hotel Le Plaza in Brussels, Belgium, 18-21 September 2006.

Microformats: Web of Data

O'Reilly European Open Source Convention

Microformats: Web of Data

September 19th, 10:00 - 10:40

Adolphe Max Room

Hotel Le Plaza

Boulevard Adolphe Max 118 - 126

1000 Brussels Belgium

Abstract

Microformats allow you to extend the limited semantics of [HTML](#), thus allowing for a richer web of data. By embedding microformats into HTML it is possible to use the semantic meaning to extract unambiguous data from the web that can then be used in other applications.

Microformats focus on how people are already publishing their data online. Then we look to see if there are any well established standards in this area - there is no sense in reinventing the wheel.

Microformats are designed to be unobtrusive, you do not need to change your current workflow and there is no specialised software. If you are familiar with CSS, then you are more than half-way to adding the necessary semantics.

This presentation will discuss the different types of microformats and how to implement them into your own site allowing for the open movement of data around the web.

Tidy

Tidy your HTML

Address of document to tidy:

- indent
- enforce XML well-formedness of the results (may lead to loss of parts of the originating document if too ill-formed)

Stuff used to build this service

- [tidy](#)
- [xmllint](#) (for enforcing XML well-formedness)
- [python](#), apache, etc.

See also the [underlying Python script](#).

*script \$Revision: 1.56 \$ of \$Date: 2006/04/24 14:44:55 \$
by [Dan Connolly](#)
but I didn't do the real work, i.e. writing tidy*

XSLT

GEO Microformats

Introduction

These are *BETA* implementations of XSLT files to transform and Geo Data encoded XHTML file into various types of XML files.

- <http://microformats.org/wiki/geo>

GEO Microformats to XML

Extract Geo Data from URL

KML

Generate XML

Tools

These are a few tools for anyone who wants to decode Geo data.

KML

If you want to create buttons or links to signal that a page is Geo data encoded, you can link to this transformation by using the following:

```
http://suda.co.uk/projects/microformats/geo/get-geo.php?  
type=kml&uri=<COMPLETE-URL-TO-YOUR-SITE>
```

Drag this bookmarklet to the bookmarks bar so you can grab KML data from any Geo data participating URL.
[View on Google Maps](#) (Drag link to the Bookmarks Bar).

Drag this bookmarklet to the bookmarks bar so you can view the GEO data on google maps.
[Extract KML data](#) (Drag link to the Bookmarks Bar).

The XSLT file used to transform the data is available at:

- [xhtml2kml.xsl](#)

Maps

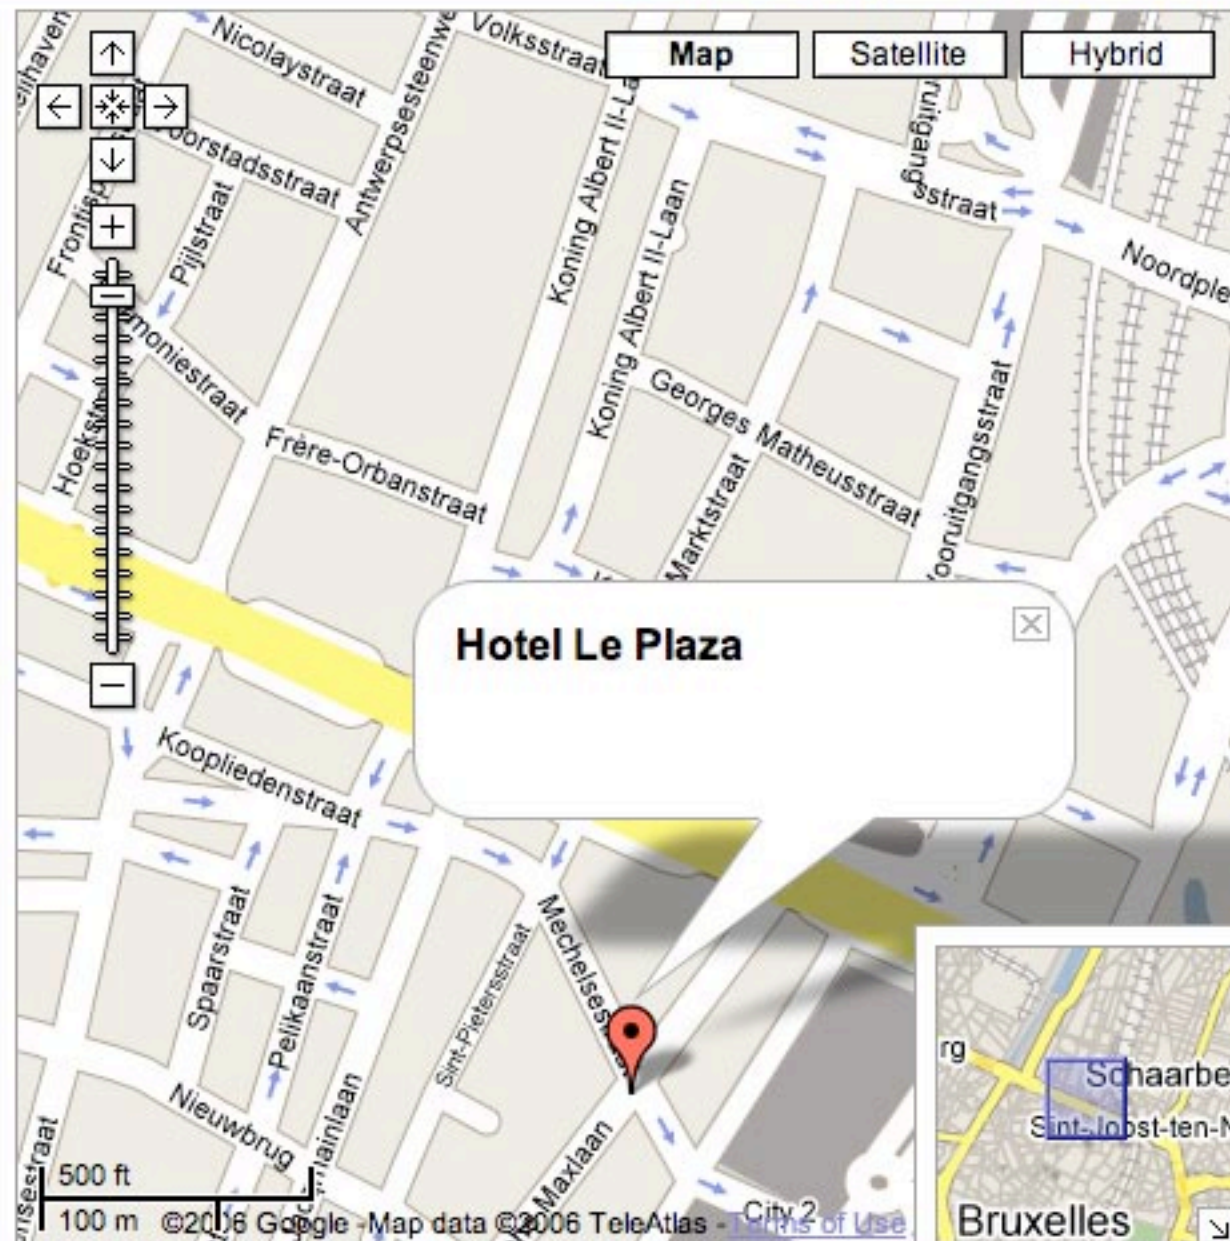

[Web](#) [Images](#) [Groups](#) [News](#) [Froogle](#) [Maps](#) [more »](#)[Find businesses](#)

Maps

 Displaying content from suda.co.uk[View on Google Earth](#)

The content overlaid onto this map is provided by a third party, and Google is not responsible for it.

Microformats: Web of Data

O'Reilly European Open Source Convention

Microformats: Web of Data

September 19th, 10:00 - 10:40

Adolphe Max Room

Hotel Le Plaza

Boulevard Adolphe Max 118 - 126

1000 Brussels Belgium

Abstract

Microformats allow you to extend the limited semantics of HTML, thus allowing for a richer web of data. By embedding microformats into HTML it is possible to use the semantic meaning to extract unambiguous data from the web that can then be used in other applications. Microformats focus on how people are already publishing their data online. Then we look to see if there are any well established standards in this area - there is no sense in reinventing the wheel.

Microformats are designed to be unobtrusive, you do not need to change your current workflow and there is no specialised software. If you are familiar with CSS, then you are more than half-way to adding the necessary semantics.

This presentation will discuss the different types of microformats and how to implement them into your own site allowing for the open movement of data around the web.

SU⁰A.CO.UK

EuroOSCON06

Microformats: Netz von Daten

O'Reilly Europäer-Geöffnete Quellversammlung

Microformats: Netz von Daten

September 19., 10:00 - 10:40

Adolphe Maximum Raum

Hotel Le Plaza

Prachtstraße Adolphe Maximum 118 - 126

Brüssel 1000 Belgien

Auszug

Microformats erlauben Ihnen, die begrenzte Semantik von HTML zu verlängern und so lassen ein reicheres Netz von Daten zu. Indem man microformats in HTML einbettet, ist es möglich, die semantische Bedeutung zu verwenden, um eindeutige Daten vom Netz zu extrahieren, das in anderen Anwendungen dann verwendet werden kann. Microformats Fokus auf, wie Leute bereits Ihre Daten online veröffentlichen. Dann schauen wir, um zu sehen, wenn es irgendwelche gut eingerichteten Standards in diesem Bereich gibt - es gibt keine Richtung, wenn man das Rad reinventing.

Microformats sind entworfen, um unobtrusive zu sein, brauchen Sie nicht, Ihren gegenwärtigen Workflow zu ändern und es gibt keine fachkundige Software. Wenn Sie mit CSS vertraut sind, dann sind Sie mehr als in der Mitte zum Addieren der notwendigen Semantik

Tidy your HTML

Address of document to tidy:

indent

enforce XML well-formedness of the results (may lead to loss of parts of the originating document if too ill-formed)

Stuff used to build this service

- [tidy](#)
- [xmllint](#) (for enforcing XML well-formedness)
- [python](#), apache, etc.

See also the [underlying Python script](#).

*script \$Revision: 1.56 \$ of \$Date: 2006/04/24 14:44:55 \$
by [Dan Connolly](#)
but I didn't do the real work, i.e. writing tidy*

SUDA.CO.UK

GEO Microformats

Introduction

These are *BETA* implementations of XSLT files to transform and Geo Data encoded XHTML file into various types of XML files.

- <http://microformats.org/wiki/geo>

GEO Microformats to XML

Extract Geo Data from URL

Tools

These are a few tools for anyone who wants to decode Geo data.

KML

If you want to create buttons or links to signal that a page is Geo data encoded, you can link to this transformation by using the following:

```
http://suda.co.uk/projects/microformats/geo/get-geo.php?  
type=kml&uri=<COMPLETE-URL-TO-YOUR-SITE>
```

Drag this bookmarklet to the bookmarks bar so you can grab KML data from any Geo data participating URL.
[View on Google Maps](#) (Drag link to the Bookmarks Bar).

Drag this bookmarklet to the bookmarks bar so you can view the GEO data on google maps.
[Extract KML data](#) (Drag link to the Bookmarks Bar).

The XSLT file used to transform the data is available at:

- [xhtml2kml.xsl](#)

European Open Source Convention

Monday, September 18, 2006 - Thursday, September 21, 2006

 [Flag for abuse](#)
 [Invite by email](#)

Hotel Le Plaza

 [Export...](#)

Bd Adolphe Maxlaan, 118-126 (Yahoo! Maps, Google Maps)
 Brussels, Brussels 1000

The O'Reilly European Open Source Convention is where coders, sys admins, entrepreneurs, and business people working in free and open source software gather to share ideas, discover code, and find solutions. At EuroOSCON 2005, nearly 500 delegates took part in sessions and tutorials across eleven technology tracks, learning about the newest features and versions from creators and experts. We anticipate that EuroOSCON 2006 will be even more successful--the place for the open source community to meet up, debate, make deals, and connect face to face with other open source enthusiasts from across the continent and around the world. EuroOSCON 2006 will take place at the Hotel Le Plaza in Brussels, Belgium, 18-21 September 2006.

24 ways to impress your friends

Practical Microformats with hCard

You've probably heard about [microformats](#) over the last few months. You may have even read the easily digestible [introduction at Digital Web Magazine](#), but perhaps you've not found time to actually implement much yet. That's understandable, as it can sometimes be difficult to see exactly what you're adding by applying a microformat to a page. Sure, you're semantically enhancing the information you're marking up, and the [Semantic Web](#) is a great idea and all, but what benefit is it right now, today?

Well, the answer to that question is simple: you're adding *lots* of information that can be and is being used on the web here and now. The big ongoing battle amongst the big web companies is one of territory over information. Everyone's grasping for as much data as possible. Some of that information many of us are cautious to give away, but a lot of it is happy to be freely available. Of the data you're giving away, it makes sense to give it as much meaning as possible, thus enabling anyone from your friends and family to the giant search company down the road to make the most of it.

Ok, enough of the waffle, let's get working.

O'REILLY Short Cuts

Using Microformats

By Brian Suda

Copyright © 2006 O'Reilly Media, Inc.
ISBN: 0-596-52817-5

Microformats let you share structured information in HTML web pages. Although the information is visible to human readers—as it should be—software can also extract structured information.

This Short Cut is a general introduction to the history of microformats and an explanation why these ideas are rocketing to the forefront of technology. It includes information and examples on how to add all of the popular microformats used and consumed today to your documents. Also included is discussion of where the idea behind microformats originated and why the microformats process is so open for everyone to contribute.

With millions of instances of microformats on the Web, isn't it about time to learn what it's all about?

Contents

- What Are Microformats? 2
