Internet on Paper

**Why paper is better
than a computer**

	Paper	Computer
Water proof	✓	✗
Electrically independent	✓	✗
Portable	✓	✗
Foldable & Tearable	✓	✗
Sit on it/drop it	✓	✗
Annotatable	✓	✗
Cheap	✓	✗
Replicatable	✓ photocopier	✓
Transmittable	✓ fax	✓
Resolution	5760+dpi	72dpi
File Format Agnostic	✓	✗

A photograph of two utility workers on a tall wooden utility pole. The pole is covered in numerous power lines. One worker is positioned higher up, near the top of the pole, while the other is lower down. The sky is a clear, bright blue. The image has a white border with a small white triangle in the top right corner.

What about the mobile phone?

Paper

A man in a white shirt and tie is looking down at a desk. On the desk, there is a microscope, a stack of papers, and a pen. The background is dark and out of focus.

Before paper, wood or bone was used but it was too clunky to carry around, just like a computer

Papyrus invented in 3500BCE in Egypt

**Paper was invented in China over 3200 years ago
Silk was lighter than paper, but more expensive**

China creates toilet paper around 600BCE

**Parchment & Vellum take off around 300BCE due to
Library of Alexandria Papyrus consumption**

1120 CE saw the first paper mill in Europe in Spain

2

A man in a white uniform is looking at a large industrial machine with many pipes, symbolizing data flow. The machine is complex and has many pipes and cables hanging from it. The scene is dimly lit, with a bright light source in the background. The man is standing on a platform, looking towards the machine. The machine has a large, curved pipe structure that resembles a ribcage. The overall atmosphere is industrial and technical.
